FAQs for Current SSNT and ACNT students

In regards to the following courses going into Teach Out:

- Diploma of Health Science
- Bachelor of Health Science (Naturopathy)
- Bachelor of Health Science (WHM)
- Bachelor of health Science (Nutritional Medicine)

• What do these changes mean for me?

The course you are currently enrolled in will continue to be delivered until the estimated final course completion dates specified in the email dated 26th March and again below.

For many of you, this will allow sufficient time for you to be able to successfully complete your Diploma or your degree.

For some students, depending on where you are up to in your course progression, and particularly if you are studying part time, you may not be able to complete all subjects in your current SSNT or ACNT course in the allocated time. However, the good news is that you will absolutely be able to complete your degree and will have the opportunity to complete in the new course offering under Torrens University.

There may also be opportunities for you to transfer to the new course offering prior to this time if you are eligible and this will be further explained in the information to follow.

• Will this impact my Trimester 2 enrolment?

No, not at all. All timetabled subjects are running as usual and as required by those students who need to compete the subject as per the course structure and recommended progression through the course. Your course structure can be found on the student hub.

• Can I transfer in T2?

The launch in T2 is predominantly for brand new students starting their course as we only have the initial study period subjects available. Please review the following in regards to determining your eligibility. If after reading the following, you are eligible and would like to apply to transfer, please arrange a meeting with a senior academic by emailing healthsciencechanges@laureate.edu.au.

- Bachelor students in second, third or fourth year - subjects are not yet available and transfer for T2 is not an option. Please remain in your THINK course and we will be back in touch about T3 eligibility later in the year.

- Upgrade Bachelor students - subjects are not yet available and transfer for T2 is not an option. Please remain in your THINK course and we will be back in touch about T3 eligibility later in the year. Note that if you transfer to the Torrens course you will need to complete a minimum of 9 subjects to obtain the degree. It is recommended that you stay in your Think Upgrade course at this time.
Diploma students – the following criteria need to be considered:

1. If you have completed enough subjects in the THINK Diploma for more than 4 subjects worth of credit in the new Torrens Diploma course then under the Credit Policy you must now complete your Diploma with THINK as you will not be able to attain credit for all of the subjects you have completed – not eligible for transfer into Torrens Diploma of Health Science.

2. You need to have completed both BHS101A Anatomy & Physiology 1 and BHS104A Anatomy & Physiology 2 to be eligible to transfer and receive one subject credit. If you complete Anatomy & Physiology 1, 2 and 3 you will be eligible for 2 subject credits.

3. If you started/completed Bioscience, you need to also have completed Biochemistry 1 to be eligible to transfer.

   Students who have completed the Diploma (or will have by the end of T1 2019) who would like to upgrade to one of the bachelor degrees:

   o Option 1 – For T2 only, upgrade into a THINK degree course however understanding it is in teach out and there is a teach out date of T3, 2021 at which stage if you have not completed you will be transferred to the new TUA course.

   o Option 2 – wait until T3 when you can apply to upgrade into the new TUA course.

What if I would like to transfer but are not eligible for T2?

Continue in your current course and then eligibility information for T3 will be available at a later stage and opportunities to meet with an academic arranged.

In the meantime you are welcome to review the course structure and mapping documents now available on the course pages of the Student Hub - https://studenthub.torrens.edu.au/Hub/health

Where can I find out more information on the new courses?

Course information is available on the Torrens website https://www.torrens.edu.au/courses/health

Webinars are also planned to go through the new courses with dates/times TBC.

What if I have further questions?

All available information is either on the course page of the Student Hub or the Health Science Changes page https://studenthub.torrens.edu.au/Hub/health#course-update and this is regularly updated so please continue to go here first. If your question is not answered there you may email healthsciencechanges@laureate.edu.au
