Staying COVID safe on our campuses

As long as serious concerns about the spread of COVID-19 remain, we will take a very cautious and staged approach in our return to Campus. We are one community and it is important that we all work together to ensure each other’s safety.

We need to trust and rely on one another to follow health and hygiene guidelines provided on campus. They are aimed at protecting ourselves and each other from the spread of COVID-19.

What we are doing to prepare our campuses for opening?

- Prior to reopening, our campuses will undergo thorough safety inspections, including air-conditioning, and be cleaned. This process will continue daily including high touch points
- All furniture will be placed according to social distancing considerations. Please do not move additional furniture into rooms.
- Hand sanitiser stations will be available at all Campus entrances. Please use the sanitisers as you enter and exit the building.
- Health, Safety & Hygiene guidelines will be posted in key areas. We ask that you read them and follow these expectations including physical distancing and how to effectively wash hands and use sanitisers.
- Daily reporting through our COVID-19 monitoring system will enable us to be alert to any potential COVID cases

If and when you are returning

- If you’re not well, please don't come into Campus. If you have a fever, cough and difficulty breathing, seek medical attention
- If you or anyone in your household is being tested for COVID-19 or any of your household is in self-isolation due to being in contact with someone with COVID-19, please do not come into Campus
- You will be checked in and out of campus – please follow the instructions of campus staff for your own and others’ safety
- Please come to campus with any food you require and a full water bottle. All kitchens will be out of use during this first phase of reopening
- Please ensure you bring your own pens, books, computers and other required items. We kindly request you don’t share your personal property with others.

When you are on Campus

- If you’re not well whilst on Campus, please advise a Campus contact person and go home. If you have a fever, cough and difficulty breathing, seek medical attention
- Please take notice of the many health and hygiene reminders around the campus and implement the strategies as your contribution to a safe campus
- **Wash your hands frequently:** Regularly and thoroughly clean your hands with an alcohol-based hand rub (sanitisers) or wash them with soap and water. Avoid touching your eyes, nose and mouth
- **Cover up and keep your distance:** Cover your mouth and nose with your bent elbow or tissue when you cough or sneeze. Then dispose of the used tissue immediately.

   **We thank you for your continued support. Remember, we are all in this together.**
